"Who Hedges the Barrel? Sovereign Oil Hedging and Petro-Currency Reactions to OPEC News"

- Testing whether sovereign oil hedges reshape a currency's reaction to OPEC news: smaller under Norway's krone conversions (vs unhedged Canada), kinked under Russia's budget rule, one-sided under Mexico's puts
- Building an original dataset of each country's rules from central bank and finance ministry records, with predictions fixed in advance and the dollar's own moves stripped out
- Testing whether what remains is tradable after costs, judged by Sharpe ratio and a White reality check

Empirical CAPM Test

MATLAB

- Tested the CAPM on 694 anomaly portfolios in 54 countries (JKP global factor data) with Newey-West t-tests and the GRS joint test, rejecting it jointly in 48 of 53 countries
- Showed momentum (35 of 54 countries) and value (28 of 54) earn the most persistent alphas and size almost none (5 of 54); 123 of 215 significant alphas survive a multiple-testing correction

Monte Carlo Option Pricing Engine

MATLAB

- Priced European and Asian options by simulation, benchmarked against Black-Scholes; a geometric-Asian control variate cut the arithmetic-Asian standard error by 97%, equivalent to 1,276 times as many paths
